PE12	PE12	BrunePNAAS2020	4750	87	2563-2308 cal BCE (3935 +/- 308P, Ly-14875)	Occitanie (South), Villedebert, Dolmen des Peiro/Pas	France	43.1355	2.2519	F	n/a (female)	H1	Maybe	N				"A male unearthened from a collective burial site (dolmen) near Carcassonne in southwestern France with artifacts of the Bell Beaker complex. The monument was indeed deeply reworked in Chalcolithic. During the Bell Beaker period, most of the side jambs and the backside of the room were removed or broken, and the hall and antechamber were completely destroyed. After removal of the remains of bodies, some still in process of decomposition, a "house of the dead" was erected on the same site, provided with a covering resting on two pillars of stones. This construction served as a collective burial for a relatively short period, and contained the bodies of nearly a hundred individuals, adults of both sexes and children of all ages. After which the superstructures of the tomb seem to have been dismantled, and the deposits were covered by a cope of large pebbles arranged with care."

"Follow-up excavation uncovered a Chalcolithic hypogeum with more than 9,000 human remains as well as lithic and ceramic material, the latter assigned to the Bell Beaker tradition". The first funerary phase (UE-15) shows a large number of successive inhumations (minimal number of individuals 36) that are still in anatomical position, placed in lateral decubitus and with flexed knees. Seven arrow points were retrieved from this layer. A thin, upper layer (UE-5) probably represents a re-organization of the existing funerary space, prior to the second funerary phase (UE-2). At UE-5, two Bell Beaker vessels of maritime style were retrieved. The UE-2 layer comprises fewer inhumations, and all of them were accompanied by typical Bell Beaker vessels: three in Maritime style, and two in epi-Maritime style. There were also numerous additional pieces of diverse typology. Over this layer, a final one, labelled UE-3, contained two more skeletons arranged over riverbed pebbles with a Bell Beaker vessel of a regional style known as "Pyrenaic".
